# **Metatrader 4 and FOREIGN EXCHANGE MARKET**

The foreign exchange (currency, forex or FX) market is where currency trading takes place. Forex trading transactions typically involve one party purchasing a quantity of one currency in exchange for paying a quantity of another. The FX market is one of the largest and most liquid financial markets in the world, and includes trading between large banks, central banks, currency speculators, corporations, governments, and other institutions. The average daily volume in the global foreign exchange and related markets is continuously growing. Traditional turnover was reported to be over US\$ 3.2 trillion in April 2007 by the Bank for International Settlement. Since then, the market has continued to grow. According to Euromoney's annual FX Poll, volumes grew a further 41% between 2007 and 2008. MetaTrader 4 (MT4) is the most complete and most popular trading platform developed by a MetaQuotes software company for online trading on the Foreign Exchange Market. You can find a list of brokers on the last page of this User Guide or independently in internet.

# **EA BOSS Demo Version**

## **Package includes:**

1. Boss-Demo.DLL
2. EA BOSS DEMO version.ex4
3. User Guide

EA BOSS - is unique trading robot (Expert) that monitors the market situation 24 hours/day and makes profitable trades for you. Just keep your Metatrader4 on all the time even if you are away or a sleep.

EA BOSS will do all the work for you to bring you very good profits!

# **EA BOSS** Easy steps how to setup and run advisor

## **Step1**

Unzip the files from **EA BOSS free demo-testing version!.zip** archive.

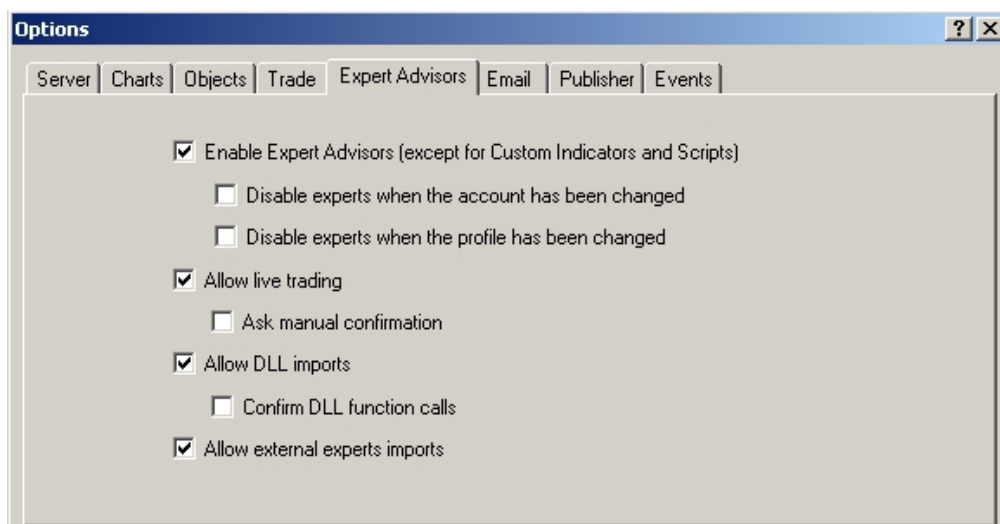

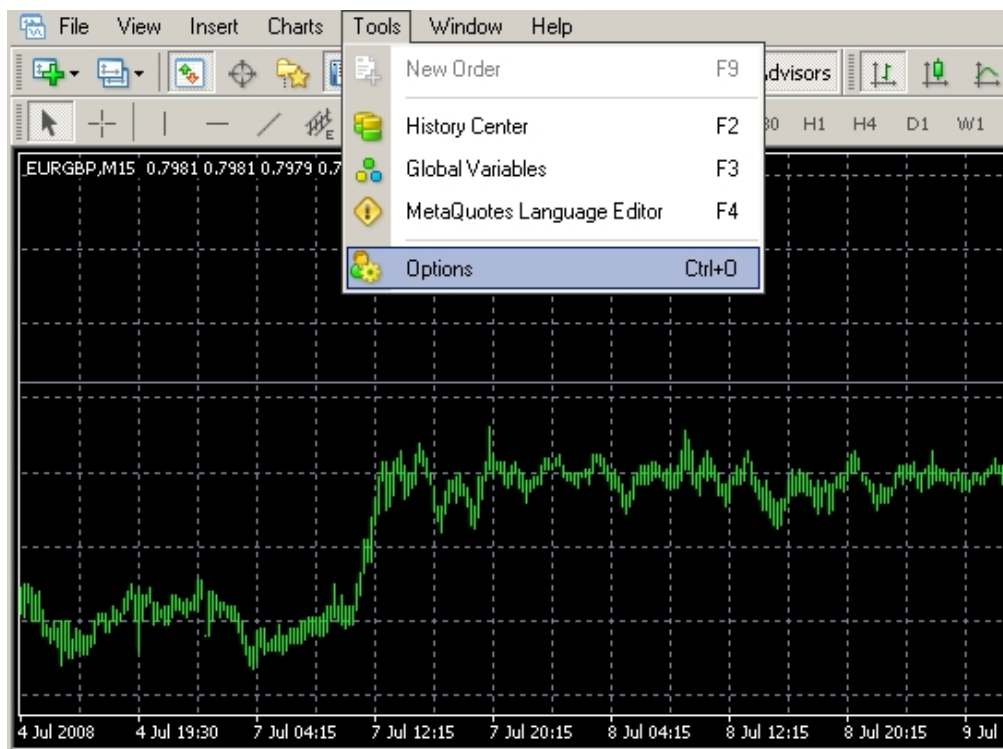

Place **EA BOSS DEMO version.ex4** into **...\experts\** folder of your Metatrader4 directory.

It is often **C:\ProgramFiles\Metatrader4\experts\**  
The way can differ depending of your broker.

It is recommended to place **Boss-Demo.dll** into **C:\WINDOWS\SYSTEM\** folder for faster computing. Or you can place it into **...\experts\libraries\** folder.

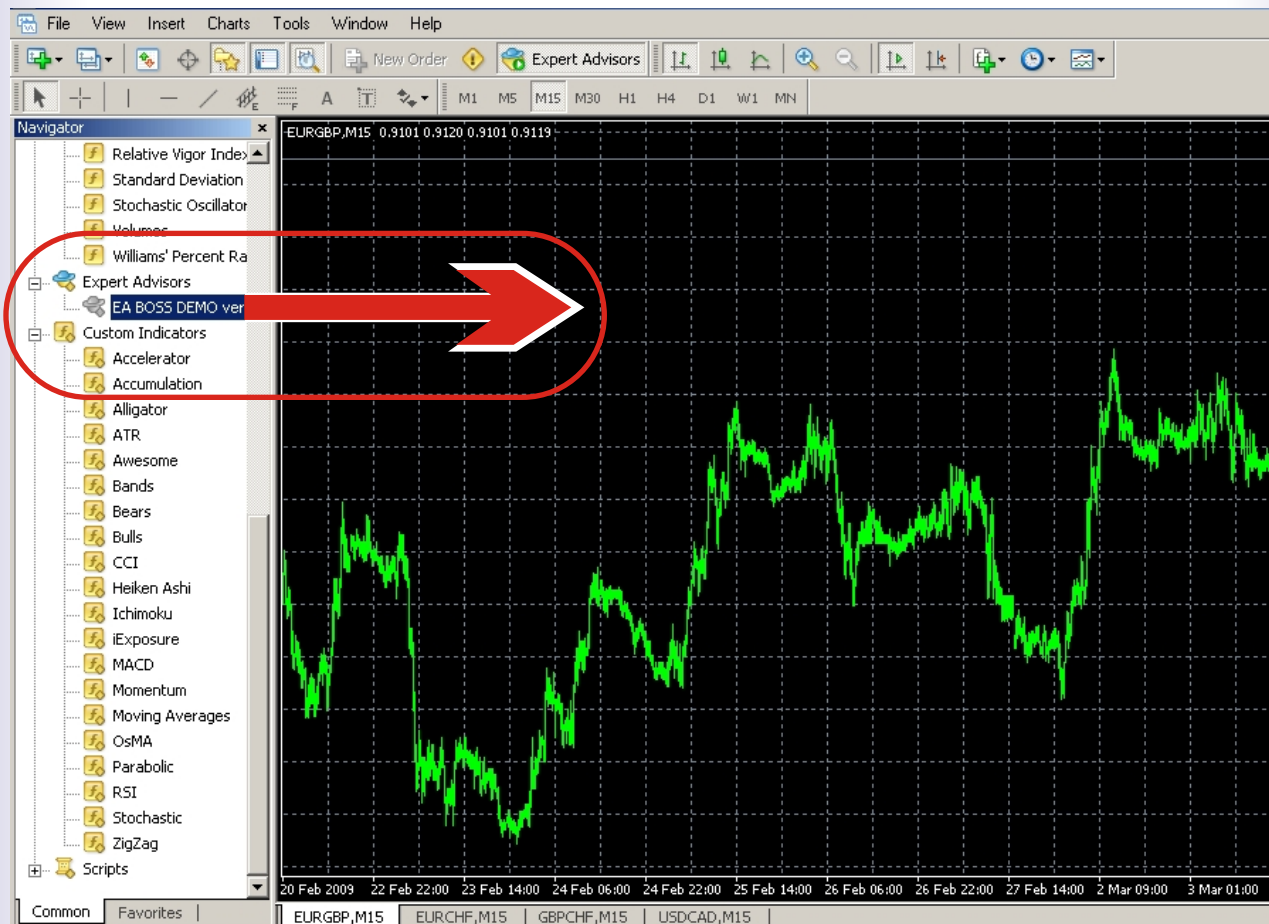

# Step2

Run Metatrader4 platform  
and open your Demo account.  
Allow DLL imports (without confirm  
DLL function calls) and live trading  
In Tools->Options->Experts Advisors tab.

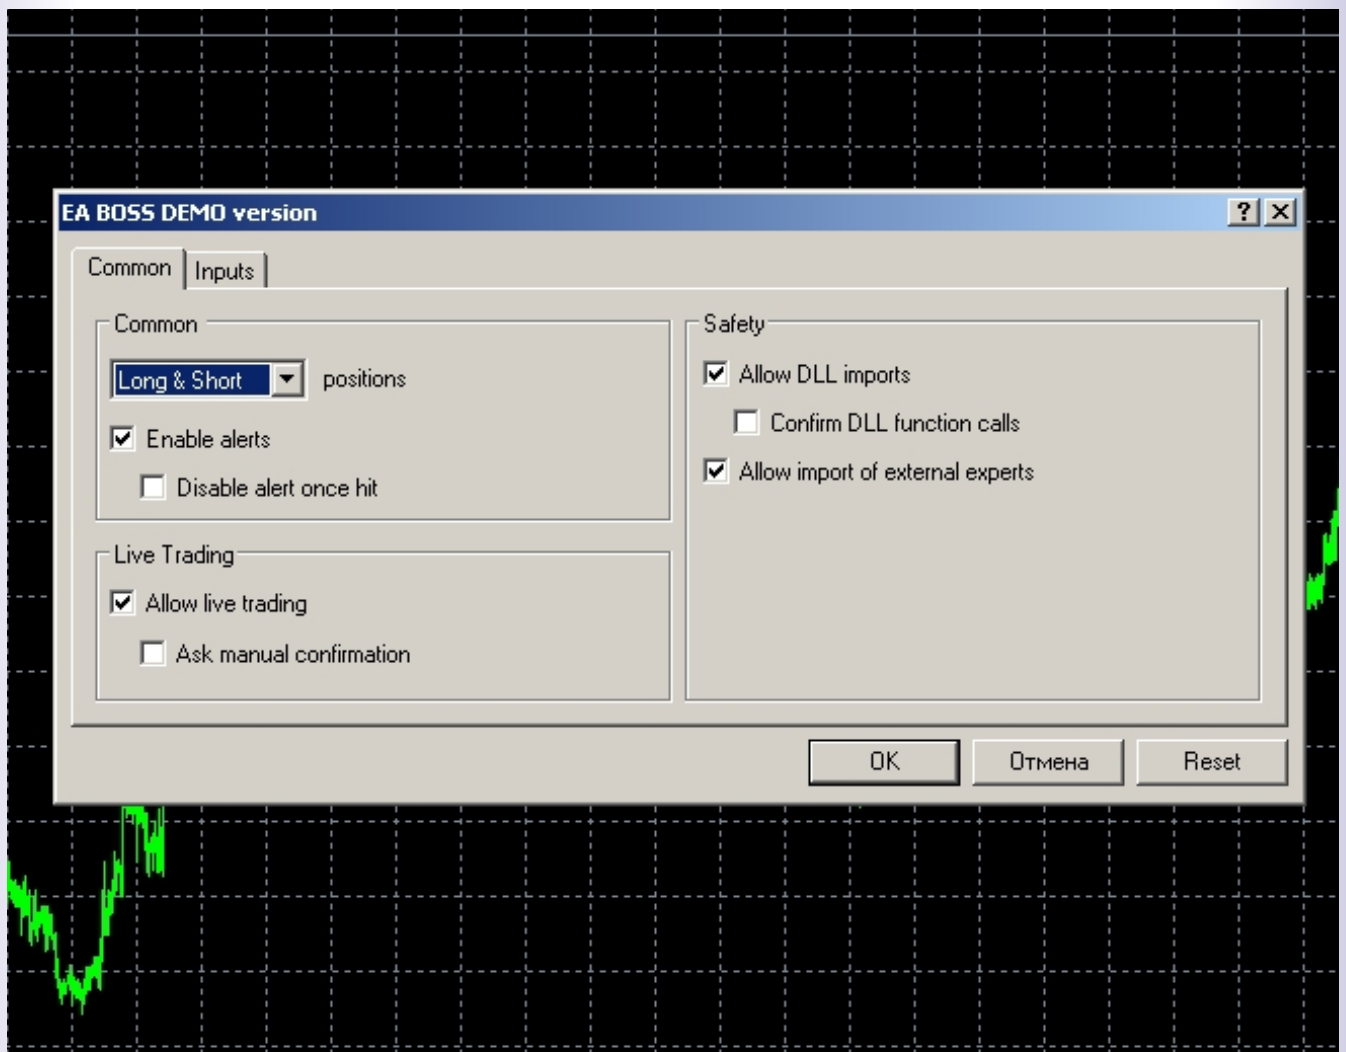

# Step3

Click on «Expert Advisors» button to activate advisors in Metatrader4. You will see the EA BOSS DEMO version under Navigator menu in the left. EA BOSS can work only on EURGPB, EURCHF, GBPCHF or USDCAD pairs. Choose the currency pair you want to trade and open its chart window with price candles. For example you want to run EA BOSS for EURGPB Chart at any Time Frame. Then drag and drop the advisor from «Navigator» menu to the chart window:

# Step4

After attaching EA BOSS to the graph you will get the Window with Advisor's Parameters. You need to set Common «Long and Short positions» and check is DLL imports allowed (without confirm DLL function calls) and is live trading checkboxes enabled to let advisor trade forex for you.

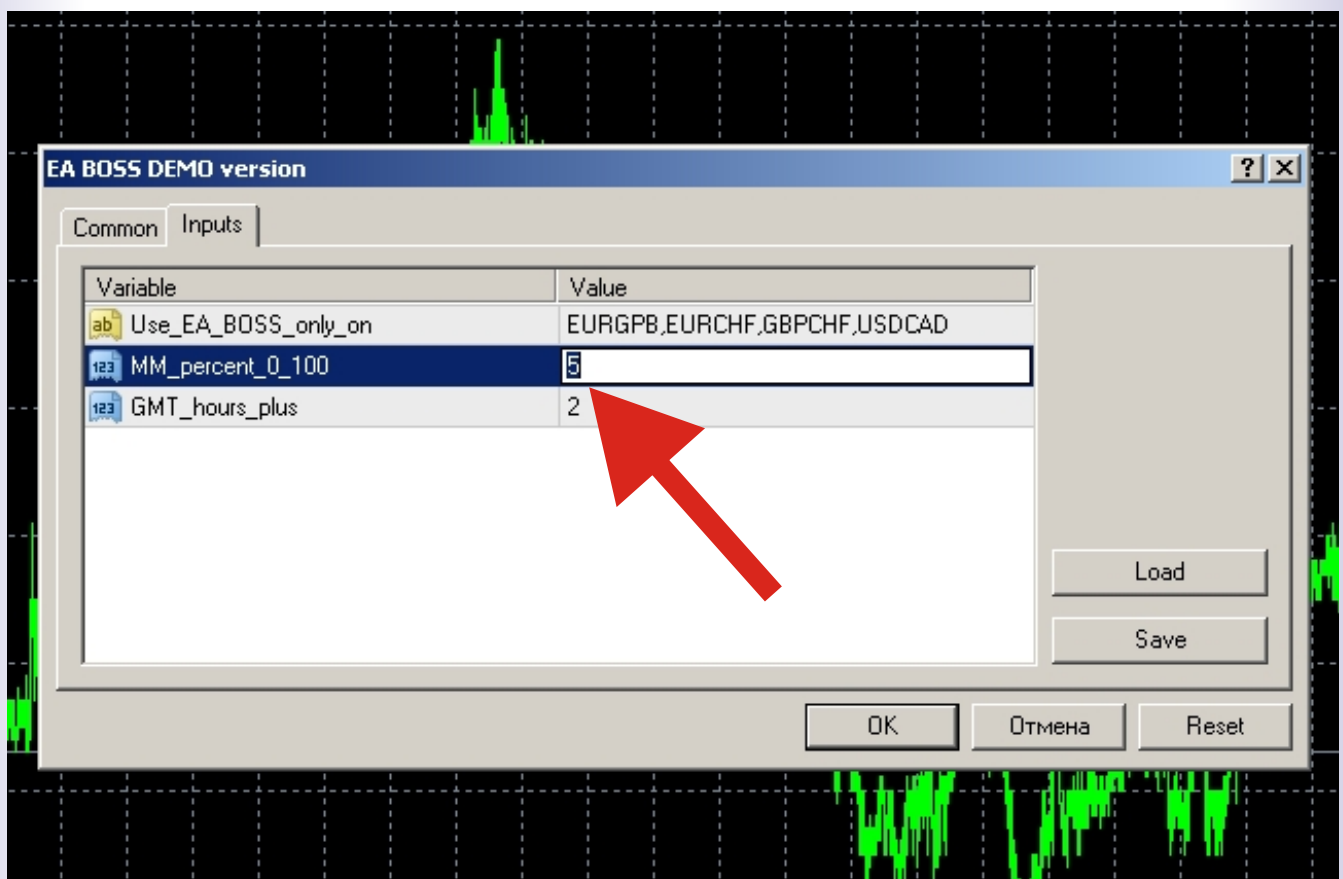

# Step5

Now you need to check and edit the "MM\_percent\_0\_100" and "GMT\_hours\_plus" in «Inputs» menu.

You can also load and save presets there.

Use the "MM\_percent\_0\_100" to change your money management as you wish. 20% is recommended for leverage 1:100. Place not more than 5% for leverage 1:500, 10% for leverage 1:200. If you place the "MM\_percent\_0\_100"=0 EA BOSS will trade with minimal lot=0.1 (minimal risk)

# Step6

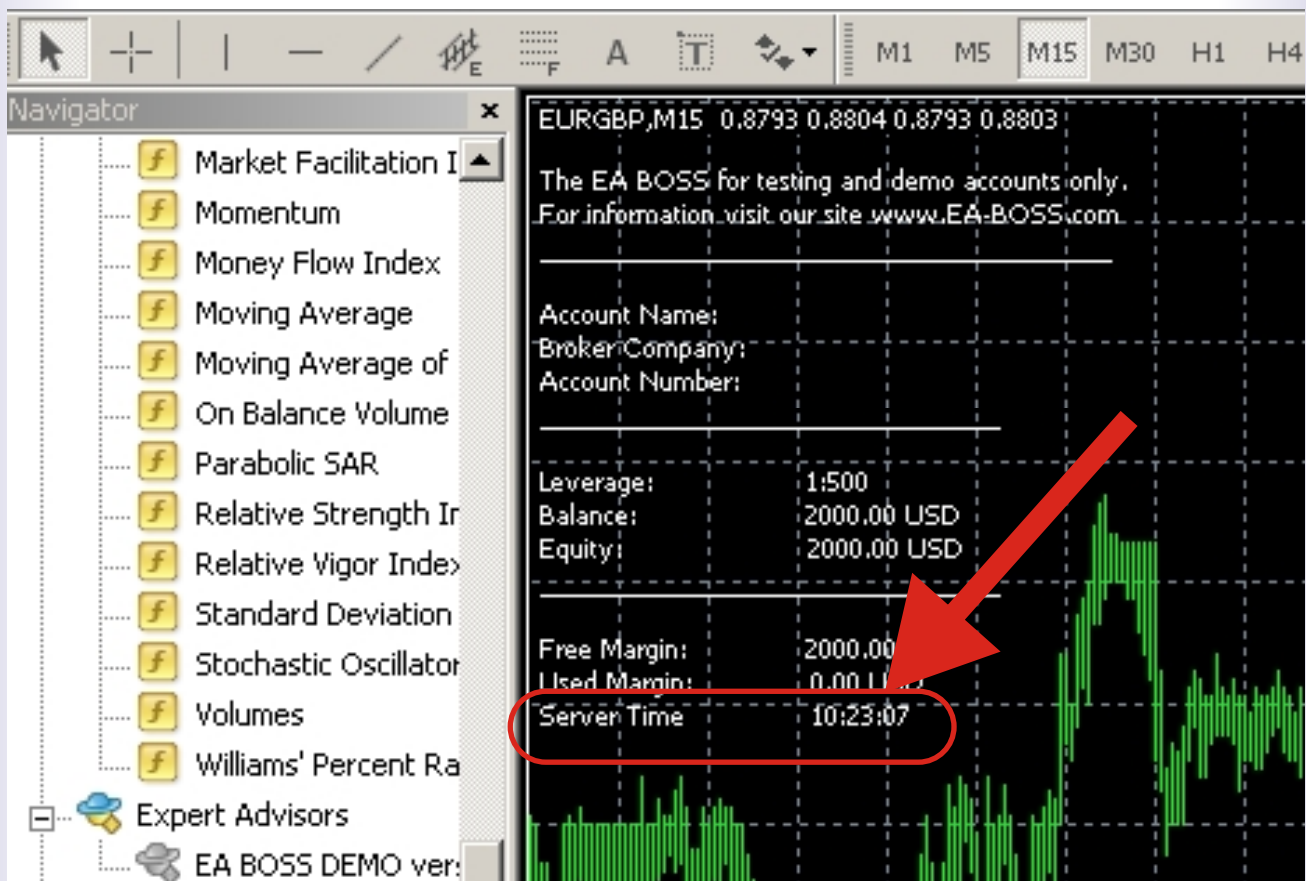

The "GMT\_hours\_plus" parameter is a difference between Server time of your broker and GMT at "+" value.

For example:

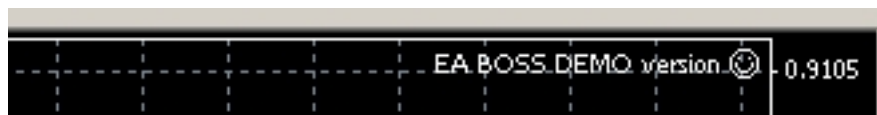

If Brokers Server Time=3 and GMT=10  
( $3-10=-7 \rightarrow$  if less then zero  $\rightarrow 24-7= +17$ )  
"GMT\_hours\_plus"=17

If Brokers Server Time=12 and GMT=10  
( $12-10= +2$ ) "GMT\_hours\_plus"=2

Then click OK to run the advisor!

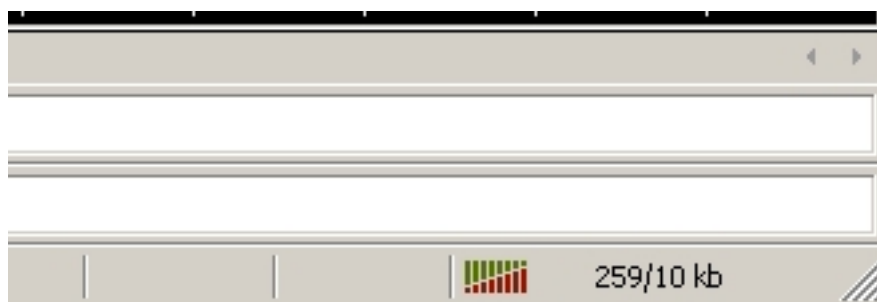

If you set the advisor correctly you will see his smiling face in the top right corner of Chart window. That means that advisor is working and monitoring the market now.

Note: EA BOSS don't open the new orders instantly after you run them! Be patient. Advisor is monitoring the market and opens his trades only in condition of possible profits. EA BOSS will trade at European business nights and use two kind of indicators (2 RSI and 3 MA), spread, trend and volatility filters.

EA BOSS can only work when the connection to internet (in Metatrader4) is established.

Warning! You must always keep your Metatrader4 online and working to let the advisors trade. If you close Metatrader4 EA BOSS cant monitor the trades and that could cause you possible losses of deposit.

You should test EA BOSS on Demo account to check if your broker is compatible. Never trade on Real account without testing on Demo first. Your broker can take your orders too slowly, gives bad quotes or too high spread or slippage. If so we recommend you to try Demo account with another broker. The policy of our company does not allow to recommend a broker because we can not take responsibility for their reliability. We give this list of brokers only to help you find a good broker independently.
